

CORE SKILLS

Product Design

User Research · User Flows · Information Architecture · Wireframing · Interactive Prototyping · Usability Testing · Responsive Web & Mobile Design · Complex Systems (Back-Office & SaaS)

Tools

Figma (Auto Layout, Variables, Components, Design Systems) · FigJam · Adobe Photoshop, Illustrator, After Effects, Premiere · Jira · Meta Business Suite

AI & Generative Tools

Prompt Engineering · ChatGPT, Claude, Gemini, Midjourney, Krea, Astria, higgsfield, magnific · AI-assisted research, ideation and asset production

Ways of Working

Day-to-day collaboration with clients, product managers and developers · Developer Handoff & Design Specs · Stakeholder Management · Design Critique & Mentoring

Languages

Hebrew (native) · English (fluent)

EDUCATION & VOLUNTEERING

2024 – 2025 | Studies UX/UI & Graphic Design – HackerU College

Volunteering: Tzofim (Israeli Scouts), 8 years – led scout groups; programs for at-risk and special-needs children.

MESHI NAFTALEVICH

UX/UI Product Designer | Back-Office Systems, Web & AI-Driven Design

Rishon LeZion, Israel | +972-52-4442672 | meshi316@gmail.com | LinkedIn | Portfolio

SUMMARY

UX/UI Product Designer specializing in back-office systems and AI-driven design — end to end: research, information architecture, user flows, wireframes, high-fidelity Figma prototypes and developer handoff. Today: the full design output of 7 business clients at an AI agency; fluent in generative-AI workflows (ChatGPT, Claude, Gemini, Krea). Before design: 9 years in hi-tech operations and sales — so I design for the business outcome, not just the screen. Former HackerU Teaching Assistant (~80 students mentored).

EXPERIENCE

UX/UI & Graphic Designer — 2025 – Present

Solix.Ai – AI-driven creative & marketing agency

- Manage the entire design output of 7 business clients in parallel, concept to publish — design, upload and scheduling of campaigns and content in Meta Business Suite — hitting daily deadlines.
- Design user interfaces (UI), landing pages and advanced marketing assets, cracking complex creative briefs in Figma and Adobe, working directly with clients and stakeholders.
- Embed generative-AI tools (ChatGPT, Gemini, Claude, Krea, Astria) into research, ideation and production — significantly shortening the team's production times.

Freelance UX/UI Designer — 2025 – Present

MANYFEST, Bosch, Ledico, Eunye

- Designed MANYFEST's complete 40+ screen data-management back-office system from scratch — research, IA and user flows through a hi-fi Figma prototype and developer handoff — the system the startup launched on.
- Run projects end to end — discovery, audience and competitor research, design, feedback and delivery — for Bosch, Ledico and Eunye.
- Translate business goals into user-centered design solutions, owning the relationship from idea to launch.

Teaching Assistant (part-time), UX/UI & Graphic Design — 2024 – 2026

HackerU College

- Mentored ~80 career-changing students across two cohorts — research, user flows, wireframes and Figma prototypes — guiding 40+ of them end to end through their capstone projects.
- Delivered hands-on Figma and Adobe workshops and gave structured design critiques on UI, information architecture and usability.

Office Manager & Executive Assistant to CEO — 2023 – 2024

Argus Cyber Security (automotive cybersecurity)

- Led cross-organizational projects working directly with the CEO and 10 VPs, and built executive presentations that turn complex technical content into a clear visual narrative.

Earlier Experience — 2014 – 2023

Nine years in sales and operations (Castro, O.M.G. Los Angeles, KAYHUT, IDF) — team leadership, client-facing work and real-time problem solving — which is why every design I ship starts from the business need.
